TACOM

The innovative solution in dispensing devices

The ClocSpout is a reclosable device specially designed in a variety of sizes for pouring tablets as well as large and medium-sized granules such as rice, cereals, pasta, sugar cubes, sweets, spices, candies, seeds, pet food, detergent tablets, etc...

The ClocSpout offers both sift-proof closing and tamper evidence. It is a convenient and easy-to-use pouring spout for controlled flow of the product when opened. The ClocSpout allows you to use monomaterial packaging.

Features

- **Convenience:** the ClocSpout is convenient and easy to use. It has two set positions: open or closed. The ClocSpout produces a characteristic "cloc" sound that indicates that the package has been properly opened or closed.
- **Security:** safe and sift-proof closing even after repeated use. Initially glued for tamper-proof security, the ClocSpout is also tamper-evident.
- **Ease of use:** the ClocSpout is ergonomic, and is recommended for people with physical disabilities. The dimensions of the ClocSpout can be adapted to guarantee adequate dosing and to meet the requirements of each specific product.
- **Image:** the ClocSpout offers a highly visible profile with a spout that stands out on the retail shelf. The ClocSpout carton's distinctive shape is immediately recognized in the crowd of standard rectangular cartons.
- **Promotion:** the area hidden by the spout's outer surface is revealed once the ClocSpout is open. This hidden area offers a unique additional opportunity to print an advertising or promotional message.
- **Economy:** the ClocSpout is a cost effective alternative, minimizing the need to invest in packaging line modifications.
- **Flexibility:** the same machine can be used to run both conventional and ClocSpout cartons with a quick changeover time. Moreover, the ClocSpout requires only minor changes to the carton which can be easily made by the carton supplier.
- **High Performance:** the cartons with ClocSpout are designed to run on the production line at the same speed as conventional cartons.
- **Safety:** the ClocSpout is made of paperboard thereby facilitating the installation of metal detectors at the end of the packaging line.

Advantages

- ClocSpout can be formed out of the original paperboard area (currently available pouring devices are normally the result of adding an external device or extending the regular paperboard area)
- Consumers quickly understand, almost intuitively, how to use ClocSpout
- Custom-made solution for each particular project thanks to a versatile design

Cutting Edge

- Can be applied to all packaging lines
- Allows to maintain current carton supplier(s)
- Works with “bag-in-box” cartons as well

About Tacom

Founded in 1961, Tacom is a leading provider of carton-fitted pouring solutions and devices. Among its many customers are primary multinational corporations involved in both the food and non-food sectors.

ISO 9001 quality certification since 1998.

Mission

Consultancy, R&D and engineering services for the production of high quality pouring systems and related equipment.

Consultancy

Technical analysis in researching optimal solutions for carton packaging using suitable materials.

Cooperation with research institutes in conducting market surveys to evaluate consumers' opinions and preferences.

Development

Working with customers and their suppliers, Tacom creates highly customized packaging solutions, and provides samples and prototypes for in-house testing, market surveys and technical trials.

After-Sales Support

Multilingual after-sales support, as well as efficient on-site maintenance, training and assistance.
